

ELECT is a curriculum development project aimed to improve the accessibility and quality of higher education in the field of energy efficient lighting at universities in Zambia. The project is being implemented at two universities in Zambia in cooperation with two European Universities.

The main activities of the project include the modernization of bachelor's and diploma curricula, the introduction of innovative teaching and learning methods, the establishment of teaching and research infrastructure, and teacher training.

The project will also foster cooperation among academic institutions, industry, and society for sustainable results.

ELECT belongs to the Erasmus+ programme of the European Union for the action Capacity Building in Higher Education (CBHE).

CBHE action supports international cooperation projects based on multilateral partnerships between organizations active in the field of higher education. It supports the relevance, quality, modernization and responsiveness of higher education in third countries not associated to the programme for socio-economic recovery, growth and prosperity.

Project Start: 1 January 2026
Duration: 3 years
Coordinator: Aalto University, FI

Co-funded by
the European Union

ELECT

**ENERGY EFFICIENT LIGHTING
FOR CLEAN ENERGY
TRANSITIONS IN ZAMBIA**

<https://www.elect-erasmus.eu>

MAIN OBJECTIVES

The overall objective of the ELECT project is to improve access and quality of higher education in energy-efficient lighting at Zambian universities to support the green transition, and contribute to a low-carbon, sustainable economy.

The specific objectives of the project are:

- To develop and modernize courses and hands on learning in efficient and smart lighting
- To improve pedagogical expertise and teaching infrastructure for high quality, student centered, and digital education
- To raise the awareness and stimulate the cooperation between university, industry, and public sectors for the promotion of energy efficient lighting
